Public Health Officer issues quarantine order

Riverside County health officials have issued a quarantine order for one of the passengers from the Wuhan, China flight who attempted to leave March Air Reserve Base (MARB).

Riverside County Public Health Officer Dr. Cameron Kaiser issued the order requiring the person to stay for the entire incubation period or until otherwise cleared. This action was taken as a result of the unknown risk to the public should someone leave MARB early without undergoing a full health evaluation.

The individual will remain at MARB until their health status is confirmed. All other passengers from the flight also remain at MARB and continue to be evaluated.
